EDUCATION

BTech in Computer Science and Engineering
VIT Bhopal University

Graduating May 2027
8.3 CGPA

TECHNICAL SKILLS

Languages: Python, Java, C++

Databases: MySQL, PostgreSQL

Web and Backend : HTML5, CSS3, JavaScript, React.js, Node.js

Cloud & DevOps: AWS (EC2, S3, IAM), Git, CI/CD Basics

Machine Learning & Artificial Intelligence: TensorFlow, CNNs, Model Training & Evaluation

Data Analytics & Visualization: Pandas, NumPy, EDA, Data Visualization

EXPERIENCE

Legalman Multicon Private Limited (Digital Vakil) | Bengaluru, India
Data & AI Intern

May 2026 – Jun 2026

- Analyzed and structured real-world financial and compliance datasets to support income tax filing and business registration workflows, improving operational efficiency.
- Applied data-driven and AI-assisted approaches to streamline processes, collaborating with teams to translate business requirements into practical, scalable solutions.

PROJECTS

PaisaWise [LINK](#)

Personal Expense Tracker .

- Engineered and deployed a privacy-first, minimalist expense tracker using React, Vite, and Tailwind CSS to deliver a fast, intuitive, and responsive user interface.
- Developed a client-side data solution using browser local storage, featuring a quick-add form and an interactive pie chart for instant financial analysis, ensuring user data never leaves the device.

Plant Disease Recognition System [LINK](#)

Deep Learning | Computer Vision

- Developed a deep learning-based plant disease recognition system using Convolutional Neural Networks (CNNs) to classify plant leaf images, achieving **94% accuracy**.
- Implemented end-to-end model training, image preprocessing, and evaluation pipelines in **Python** using **TensorFlow/Keras** on **Google Colab** for efficient experimentation and scalability.

Semantic Search System with Fuzzy Clustering & Semantic Cache

NLP, Transformers, FAISS, FastAPI, Python

- Engineered a production-grade semantic search engine leveraging transformer-based embeddings and FAISS vector search to deliver fast, scalable, context-aware document retrieval beyond traditional keyword matching.
- Integrated Gaussian Mixture Model-based fuzzy clustering and a custom semantic caching mechanism, alongside FastAPI endpoints, to optimize multi-topic relevance and significantly improve query performance on the 20 Newsgroups dataset (20K+ documents).

CERTIFICATIONS & ACHIEVEMENTS

- **NPTEL HCI (IIIT Delhi):** 94% score; strong foundation in user-centered design.
- **Founder & Vice President :** Agentic Intelligence Society, VIT Bhopal.
- **SIH 2025 (Internal):** Led two teams; **Top 75/1000+** submissions.
- **AWS Technical Essentials** (Certified).
- **Apoorv CTF 2024:** AIR 161.
